Electra-Ride™ II
Straight Rail Stairlifts

BREAKING THE BARRIERS

*Battery-Powered
Stairlifts*

Adjustable Seat Width

BRUNO
for your independence

BRUNO*The Electra-Ride II Straight Rail Stairlift makes going up & down stairs a pleasure!***Battery Powered
Adjustable****Best Value**

The Electra-Ride II features a wide range of standard features for the best value in stairlifts today! Remote call/sends, 45- and 90-degree seat swivel (at both the top and bottom of the stairs), adjustable swing-out arms and a 350 lb (159 kg) rider capacity are *all* included with the Electra-Ride II. Similarly priced units either don't offer these features or make them available only as extra-cost options.

Flexible Seating

With the Electra-Ride II, seating can be adjusted to meet a wide variety of needs. The seat height can be adjusted from 22.5 in to 25.5 in (572 mm to 648 mm). Plus, the armrests independently swing out for easy wheelchair transfer.

Quiet, Powerful, Smooth Ride

The Electra-Ride II features a powerful rack-and-pinion drive system to give you an ultra-smooth ride. The Electra-Ride II's battery-powered system runs 'whisper quiet' in your home.

Reliable Operation

The Electra-Ride II uses two 12-volt batteries which are continuously charged by a state-of-the-art battery charger that plugs into any household outlet.

Bruno's leading-edge technology assures you access up and down the stairway *even* if the electrical service in your home is interrupted.

The arms swing out of the way for easy wheelchair transfers using the standard SRE-1550 seat. The arm release lever is conveniently located under the seat.

Optional, large SRE-1540 seat with fixed arms provides additional seat depth and width.

BRUNO
Electra-Ride™ II

Compact • Safe
Affordable

*With Bruno, your lifestyle doesn't have to be limited by stairs.
 Enjoy the home you love...upstairs and down!*

Safety

When traveling up and down your stairs, the Electra-Ride II will automatically stop when it "senses" any obstacles. Plus, when you're ready to get off the unit upstairs, the seat easily swivels so you face the hall (a seat belt is standard). The Electra-Ride II meets all ANSI A-18.1 residential requirements as well as all public building specifications (with the optional commercial package).

Affordable

The Electra-Ride II is simpler and less costly to install than other units since there is no need to install additional electrical outlets...it's completely battery powered!

The arms, seat and footrest flip up, creating plenty of space for guests to walk up the stairs.

The two wireless call/send controls make the installation simple and clean with no wires running along the wall.

Easy on-and-off thanks to the Electra-Ride II's unique design.

Electra-Ride II SRE-1550 Specifications

Exceptional Value

- Locking swivel seat, at the top and bottom of the stairway.
- Two remote, wireless call/send controls.
